Pursuant to the directives of paper No. 9 (filed 3/10/03), claim 15 has been amended. Claims 1-18 remain pending. The previously imposed §112, 1st paragraph rejection is withdrawn in view of the declaration.

*

Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending application Serial No. 09/337809; claim 15 is provisionally rejected over claim 15 of the copending application. Although the conflicting claims are not identical, they are not patentably distinct from each other; there is overlap of the claimed genera. This is a *provisional* obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. In re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d)

*

Claim 18 is rejected under 35 U.S.C. §112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 conveys in effect that some of the compounds of claim 1 are GH releasing

peptides, other compounds of claim 1 are GH releasing peptidomimetics, and still other compounds of claim 1 are GH releasing compounds of a non-peptidyl nature. It is not at all clear which of the compounds of claim 1 fall into which category. Especially puzzling is the subgenus of compounds of claim 1 which are intended to fall outside the scope of the term "peptidomimetics", and are instead asserted to be just "peptides". Applicants are requested to provide at least one example of a compound (of claim 1) which is a peptide, and which, at the same time, is not a peptidomimetic.
